Sand or Element Information

Please fill in the following boxes to know more about your sand or earth element, any excess will be added to our sand capital.

**Your sand or earth element will be marked as written below; please avoid location mistakes.*

Country

Town/City

Region (Name of area)

Processing your sand or elements before shipping

Each Aanyeh item requires less than 2 regular spoons worth of material. The extra will be added to our sand capital if you sent more.

Please be sure to follow any relevant rules or guidelines when collecting sand or earth elements, and be sure that you're not breaking any rules, or act unethically

Make sure that the sand or earth element is dry, doesn't include any water, and is clear of any organic matter

We suggest suspending sand in a glass of water, removing anything that floats, give it the chance to dry, then send

Make sure to securely close the container of the sand to avoid any leak, and carefully follow the rules of packing by the courier recommendation

Flower Petals need to be dried before a week, Your dried petals need to be sent within locked bag

Please check this box to admit you've got cleaned your sand as indicated on top

I have followed all local laws and regulations when it comes to the collection of the sand or earth elements
